

BWF diamondPRISM® structure
for extruded profiles

BWF diamondPRISM® profile

NEW at BWF Profiles: Plastic profiles with embossed BWF diamondPRISM® structure

- modern design
- excellent lighting for workstations
- invisible light source
- due to inverse structure
 - no pre-determined breaking points
 - no additional mounting plate necessary
- homogeneous appearance due to uni-directional structure
- customised colour for better glare reduction possible

Technical Details

Material:
PMMA clear and Polycarbonate transparent,
customised colours possible

Applications

- for lighting families in combination with our BWF diamondPRISM® sheet
- for glare-reducing luminaires
- for architectural light lines and ceilings

The prismatic structure can be applied to almost every cross-section (flat or curved).
We are looking forward to your next project for a special profile with embossed prismatic structure.
