

## Fine Prismatic Sheets

BWF Profiles' fine prismatic sheets not only provide you with a homogeneous light distribution, little shades and high transmission, but also with perfect glare reduction.

### Properties

- custom shades and colours for optimum glare reduction possible
- no "rainbow effect"
- no "water glass effect", i.e. no refraction, the light source is not visible
- homogeneous, diffuse light (interior parts not visible)
- low tension -> no cracks during second operation (milling, cutting, drilling etc.)
- a combination with prism profiles in one product family is possible

### Available

We offer you **directly from stock**:

Raw material:  
PMMA clear and Polycarbonate transparent

Dimensions  
Wall thickness: 2,35 mm  
Width: 300 mm  
Length: max. 3100 mm

**Individual shades** are available on request.

### Samples

Please do not hesitate to ask for a sample free of charge.
